

German Security Forces

Royal Marines

Although these were second line troops, many of them did have combat experience and considered Poland an active war zone with lots of Partisan and Resistance activity. They did not have access to the latest equipment but were well trained and well led.

Forest Movement

Poland had many dense forests. All movement through the trees suffers -1" per dice. Furthermore no running is permitted in the forests. 4" LOS into woods 12" within.

Objective

To find and secure the rocket before the Armia Krajowa do. It has fallen amongst the trees somewhere. The Germans can secure a decisive victory by getting the Scientists to inspect the downed rocket.

Platoon Force Rating

All German troops are Regular Quality.

Special Rules

Scientist Team is activated on a 2. The Scientists are armed with pistols, their guards with rifles. Their loss would be catastrophic for the Third Reich.

Everyone is searching so there is no penalty to lose your Jump Off Points except for the inconvenience.

Dog Handlers - These can disrupt ambushes and sniff out booby traps and sniper positions. They can be deployed normally via a jump off point or they can be deployed if and when the AK attempt to launch an ambush. The dog unit can be placed between the ambusher and ambushee - the AK player must then withdraw to further than 12" away from the dog unit. The dog unit remains on board. They discover and remove any booby trap they come within 3" of it. For snipers the dog unit always counts as if in overwatch - even if moved. Therefore every time a sniper in Line of Sight fires, the dog unit rolls as if on overwatch to spot it. If spotted the dog can be released and do a run move towards sniper (even in terrain) until base to base contact is achieved (or Fido is no more).

German Security Forces	
Feldwebel - Senior Leader, SMG	
Support	
Dog Unit	Scientists with pistols
Squads One to Four	
Obergefreiter Junior Leader NCO, SMG	
RIFLE TEAM	LMG TEAM
Six Riflemen	MG34 with 3 Crew
