

CHAIN OF COMMAND

Mid War Hungarians (Hungary 1941-42)

Despite a proud military tradition, Hungary was ill-equipped for waging a war, having had to beg their German allies for necessary equipment, and by 1942, having had to purchase German armour to strengthen their forces.

THE PUSKÁS (RIFLE) PLATOON

A Regular force could represent the well-trained, core contingent of the army in the early months of Hungarian participation, or in the later months it could include conscripts that have survived long enough to gain some experience.

A Green force may represent soldiers rushed into combat with insufficient training due to the rapid expansion of the army or a force demoralised due to undersupply or exhaustion.

THE HUSZÁR (LIGHT CAVALRY) PLATOON

Descended from Magyar horsemen, the Huszár were Hungary's elite cavalry for hundreds of years.

They had a reputation for being dashing and daring, demonstrating that victories could be achieved by skill and guile, rather than solely through force of arms.

Cavalry normally deploy on foot for action, but may elect to operate mounted on their horses at no additional point cost. Rules for Horse Mounted Troops can be found in the Chain of Command: Blitzkrieg 1940 supplement (page 16).

GYUMIHUSZÁROK BICYCLE PLATOON

The Gyorshadtest (Rapid Corps) was established to be a modern, mobile and well-equipped strategic unit, containing a number of bicycle infantry battalions, also known as Gumihuszárok ('rubber hussars').

This platoon is organised as the Rifle Platoon, and may deploy on foot or use some or all of its bicycles at no cost. Rules for Bicycle Mounted Troops can be found in the Chain of Command: Blitzkrieg 1940 supplement (page 15).

HUNGARIAN NATIONAL CHARACTERISTICS

ELITE OFFICERS

The Hungarian Army had highly trained officers, backed by the cultural and military heritage of being the bulwark of Christendom against invasions from the East for many hundreds of years.

To represent this, when an officer uses two command initiatives to remove shock from a *Team* that they are attached to, they may choose to remove an additional point of shock.

LEGACY OF THE HUSSARS

The mounted Hussars were considered reckless, almost fearless warriors, renowned for harassing enemy skirmishers and overrunning artillery positions.

To represent this, mounted Hungarian Cavalry move an extra 1" when moving normally or an extra 2" when moving 'At the Double' (extra movement is in total, not per die).

SUPPORT OPTIONS

SATCHEL CHARGE

The satchel charge is shown on Table Seven, *Hand-Held Anti-Tank Weapons*. The charge may be used once by any *Squad* on the table when commanded by the *Senior Leader* commanding the platoon who is, we assume, carrying it with him up to that point. How the charge works is detailed in Section 9.3.4, *Tank Hunters*. A maximum of two satchel charges may be selected by a Hungarian force.

TWIN MACHINE GUNS

The twin machine guns on the Panzer I and 35M Fiat Ansaldo fire with a firepower factor of 8 to represent the enhanced potency.

50MM MORTAR TEAM

The 50mm mortar has no smoke rounds and only fires High Explosive ammunition. It has a minimum range of 12", but closer than that the crew may use their rifles.
